International Certificates and Safety Standards

Dispenser Certification

- British WRAS Standard
This certification ensures that all the parts of the dispenser that come in contact with the water are made from approved material and don't produce any water impurities.
- Energy Star Certification
Reduced electricity consumption up to 40% compared to any other similar drinking water appliances that are not certified.
- Service Standard (ISO9000)
- European Union Standard (CE)
- ROHS (Environmental Quality Standard)

Water Treatment Certification

- Water Quality Association
Drinking water Gold Seal
- NSF/ANSI 42, 53 & 55
American standards certification (NSF/ANSI 42) for the removal of chlorine from the water and the keeping of water quality, (NSF/ANSI 53) for keeping the water at healthy levels, and (NSF/ANSI 55) for treating the water at high levels of purity using UV technology.
- 1505 Standard from Israel Drinking Water Treatment Institute
The Israel Drinking water Treatment Institute, one of the most strict water treatment supervision authorities in the world certifies and tests periodically the water quality with respect to its level of purification and its microbiological/bacterial content.

2018 TS PLUS
Sparkling Water Maker

Innovative Purification Technology

Why Strauss Water has such a great taste?

Our water treatment technology maintains all the essential minerals in the water like calcium and magnesium. It is also proven scientifically that these minerals are essential for the human body and help in preventing chronic diseases.

What is an ACTIVE CARBON FILTER?

The Active Carbon Filter is a process of filtration that keeps within active carbon all the water odors and with the T6, T7 and TS Sparkling Water Maker large filter surface all particles as small as 0.0006 millimeters are trapped and at the same time removing the chlorine taste from the water.

Water purification system

How does the UV lamp work?

It is scientifically proven that bacteria disappear when they are forced into a Biotic Area that is created by microwaves of 260nm generated by an Ultra Violet lamp. This enclosed area eliminates bacteria and micro organisms without the slightest alternation to the vital components present in water which are necessary for our body.

Hot, Cold and Now Sparkling Water

- High quality gauze - uniform, quiet and powerful
- 3 levels of gauze - strong, medium and delicate
- Smart Heating technology that keeps in memory the heating habits for the last seven days, offering extra convenience and savings.
- New disposable CO2 cylinders for maximum comfort and safety

Sparkling Water Maker

The new TS Plus (Sparkling) Water Maker introduces a new level of taste, convenience and experience. Cold water, hot water and now fresh sparkling water, all at the touch of a button. Choose the strength of water carbonation that suits you.

Unique & Patented Single Serve Technology

The TS Plus uses the breakthrough **“Single Serve” technology** exclusively developed by Strauss Water. Every time the water carbonation button is pressed, the TS Plus freshly carbonates a 200cc glass of tasty sparkling water at the ideal temperature at the pre-chosen carbonation strength - light, regular or strong.. **Smart Heating technology** that keeps in memory the heating habits for the last seven days, offering extra convenience and savings.

New Disposable Carbonator Cylinders

The TS Plus is uniquely designed to make replacing the CO2 carbonator a fun and easy experience. The TS Plus indicates when it is time to order a new carbonator even before the old one is finished, and fitting the new carbonator cylinder is so easy that it can be done with one hand behind your back! The new TS Plus allows for disposable carbonator CO2 cylinders that make the whole process a lot easier.

Are you still Drinking Bottled Water?

State of the art technology for an endless supply of hot/cold water of superior quality.

A new invention for filtering water producing crystal clear and at the same time great tasting water for home or the office is now available. The small, programmable T6, T7 and now the TS Plus Sparkling Water Maker, dispensers are different than anything you've seen up to date. With a connection on the mains, it filters, cleans, chills, heats and dispenses water with the touch of a button even at extremely hot temperatures suitable for coffee and tea. The tripple filter and the UV lamp system offer water of excellent quality. The dispensers are programmable and easily adjustable to your specific daily needs.

2018 TS PLUS Sparkling Water Maker

Add a Sparkle to your Kitchen!

The prize-winning New Deal Design, one of the world's leading design firms, created the TS Plus with the specific purpose of bringing a special sparkle into the kitchen. The TS Plus has a modern look and an intuitive user interface with touch buttons and digital display that promise a fun and easy experience.
