

**Descaling Kit  
T6 Water Purifier**

**Dear customer,**

In this booklet you will find descaling instructions for T6 water purifier.

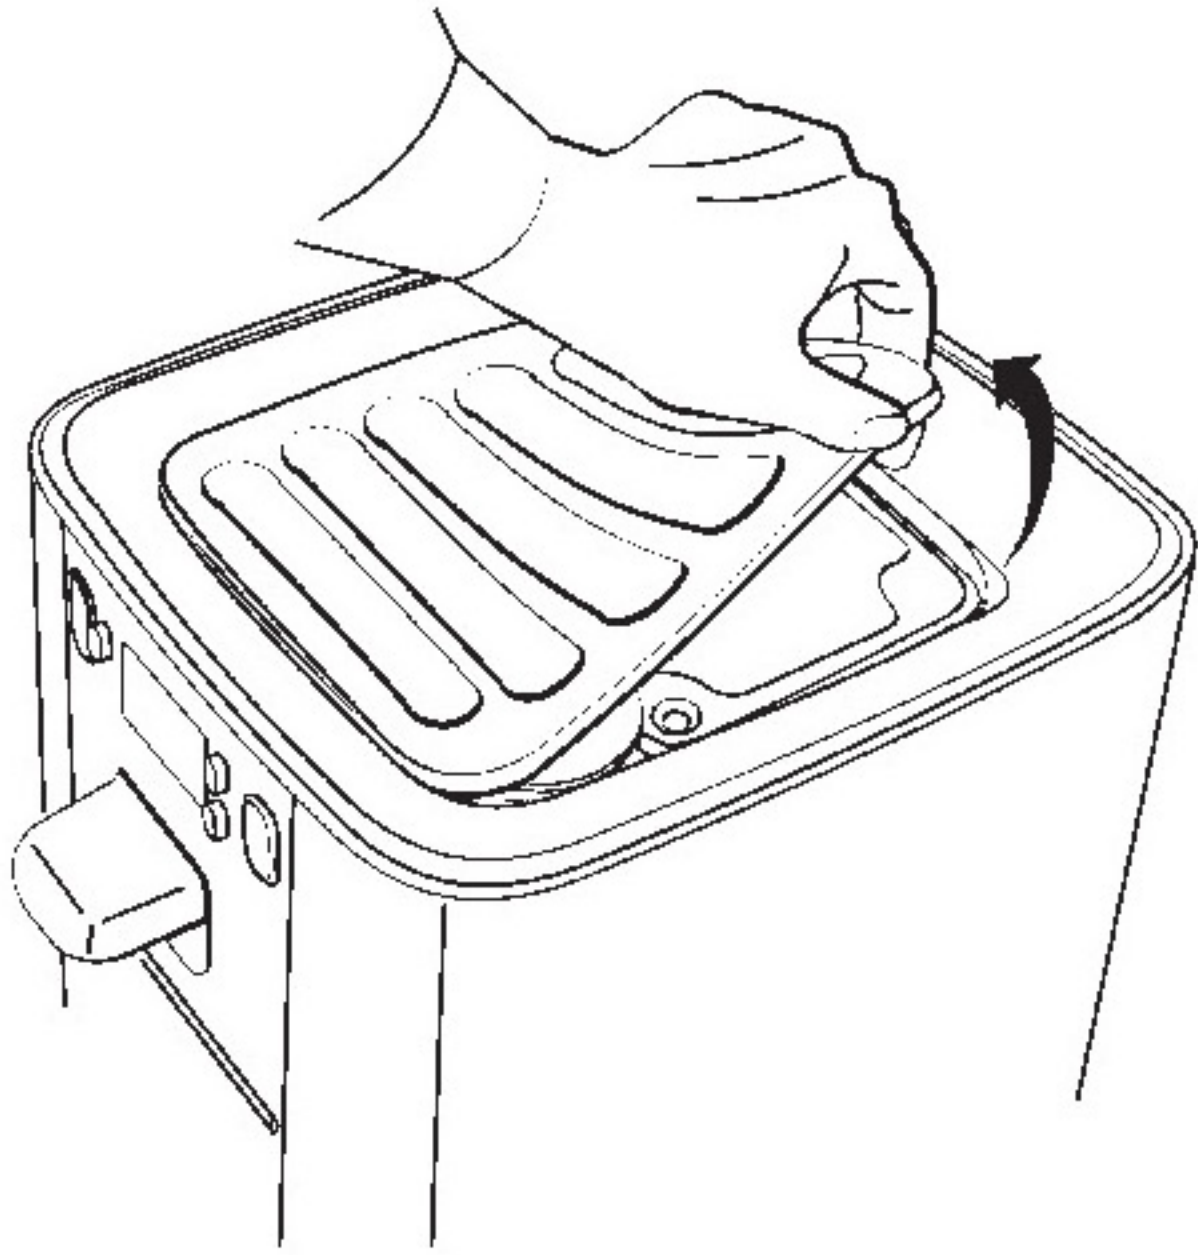

**This kit contains a descaling capsular and a warning label to prevent the use of the water purifier during the descaling process.**

**Important!** The unit cannot be used during the descaling process for approximately 6 hours, therefore it is recommended to carry out the procedure at night.

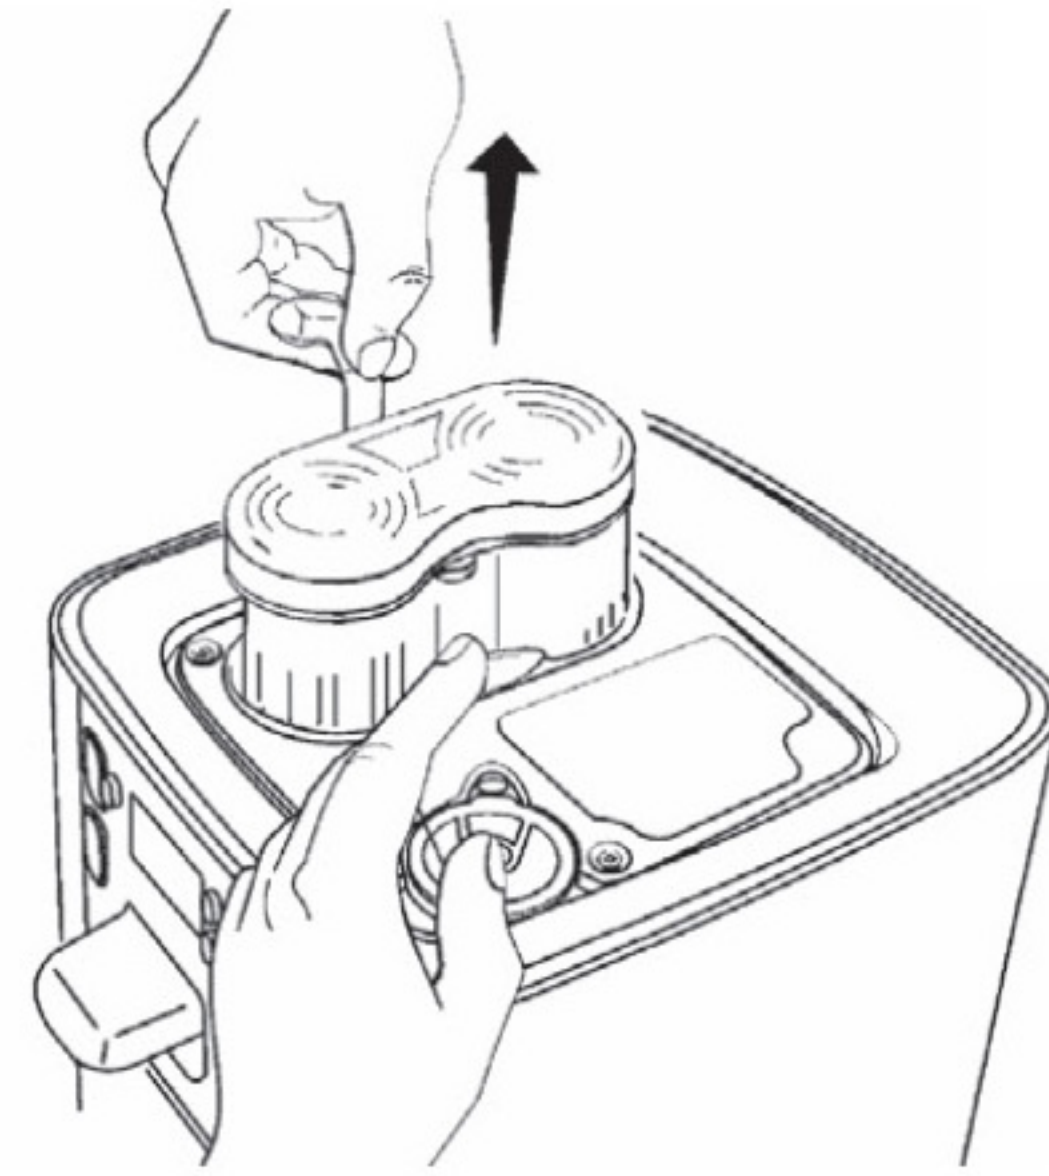

# How to use the Descaling kit?

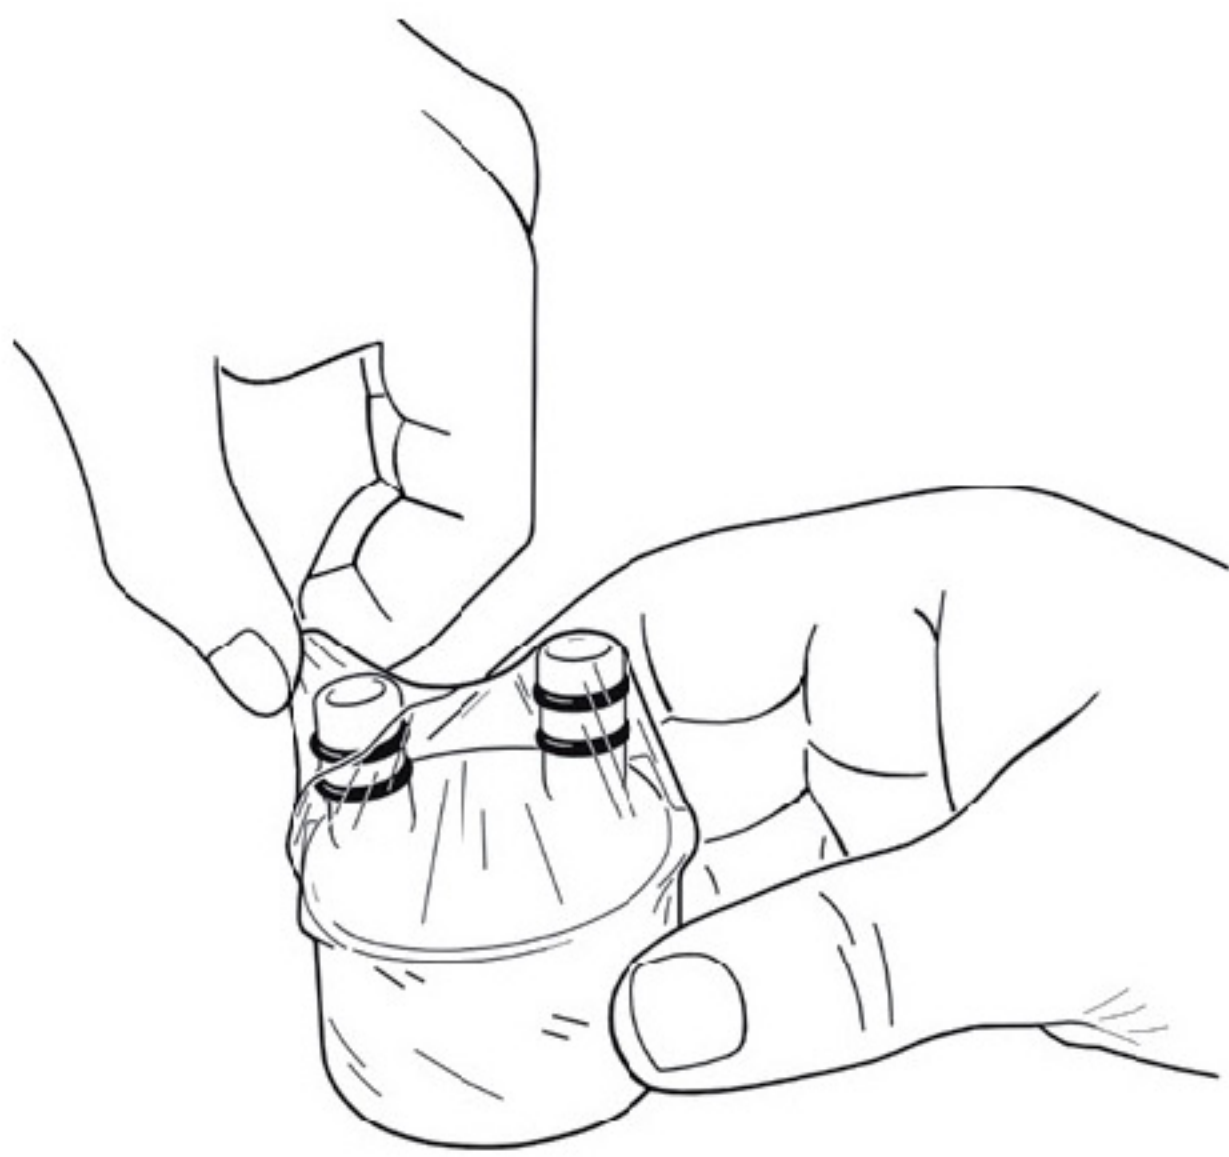

- 1** Remove the top cover.

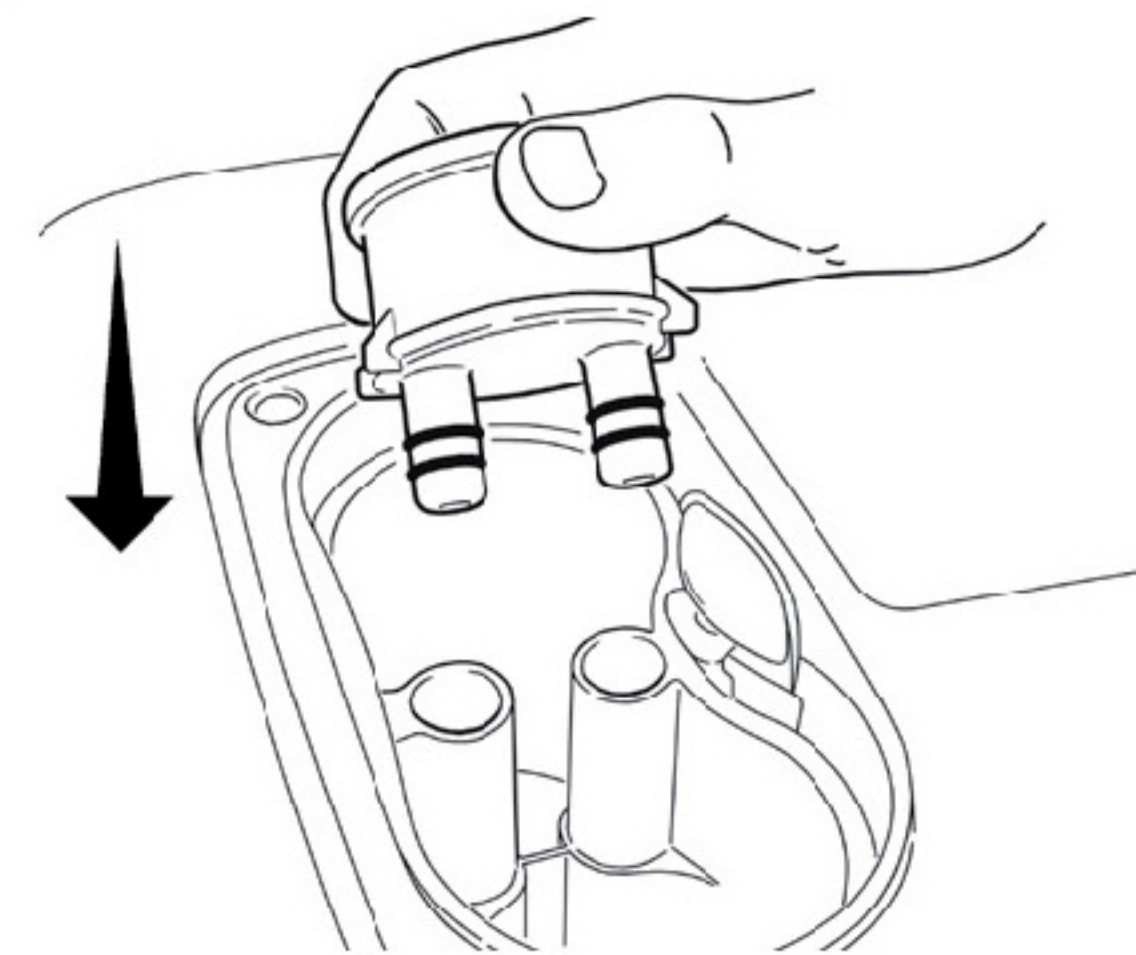

- 2** Press the PUSH button and pull the filter upwards using the extraction band.

- 3** Remove the descaling capsule from its package.

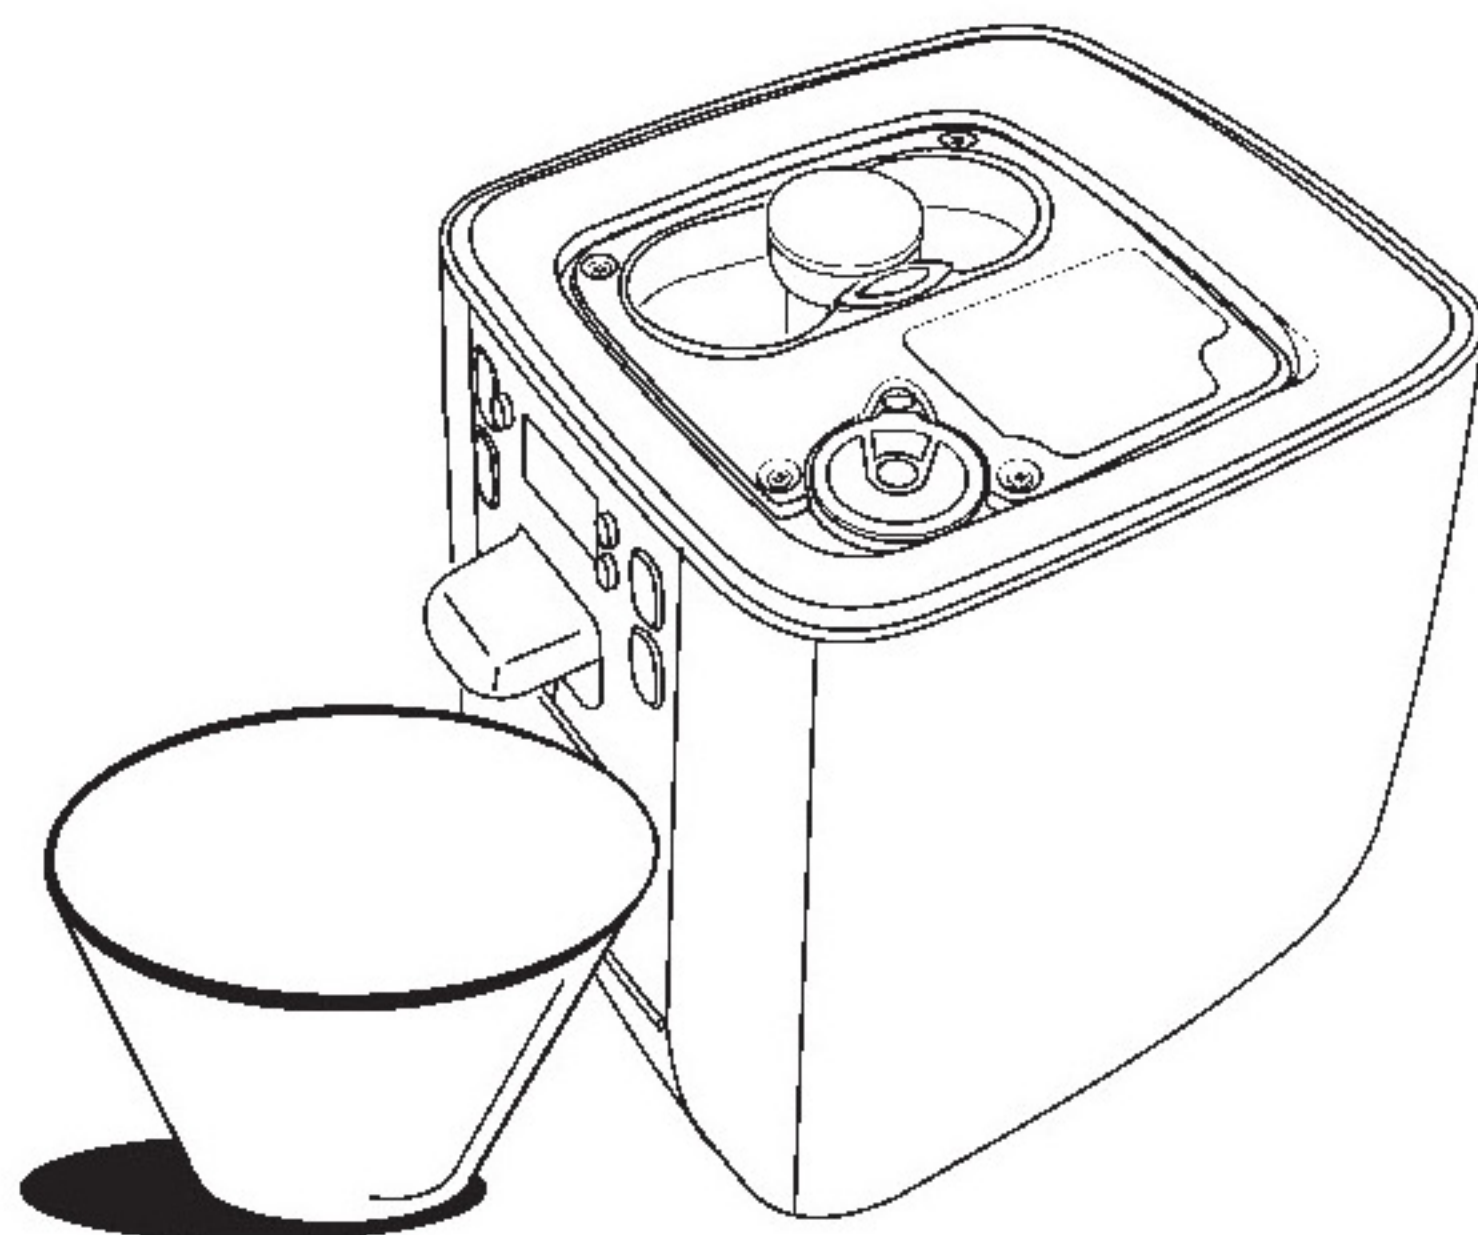

- 4** Insert the capsule into the filter's position (in any direction) until you hear a click.

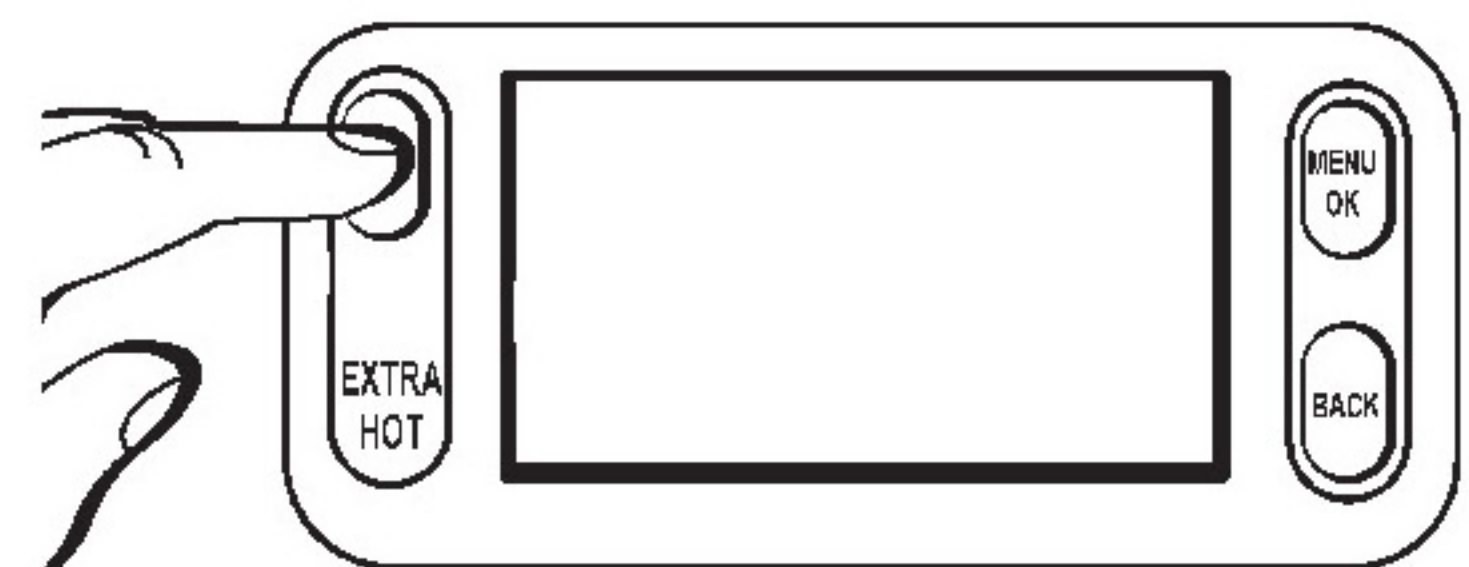

**Attention:** as of now and until the process is completed, do not drink water from the water purifier.

- 5** Place a 5 liter container under the spout.

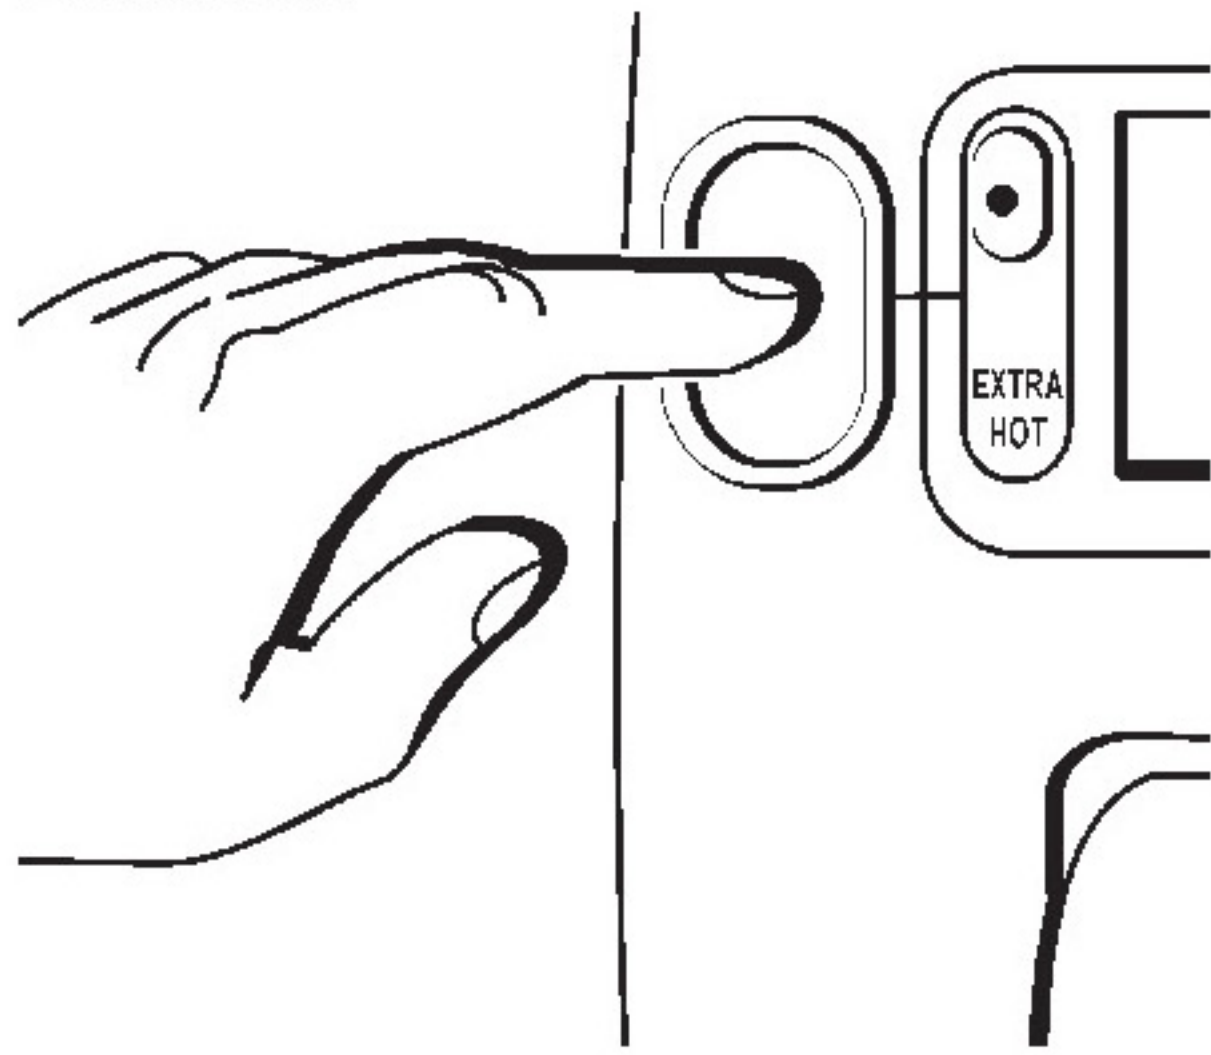

- 6** Press the EX (EXTRA HOT) button and wait until the water will boil.

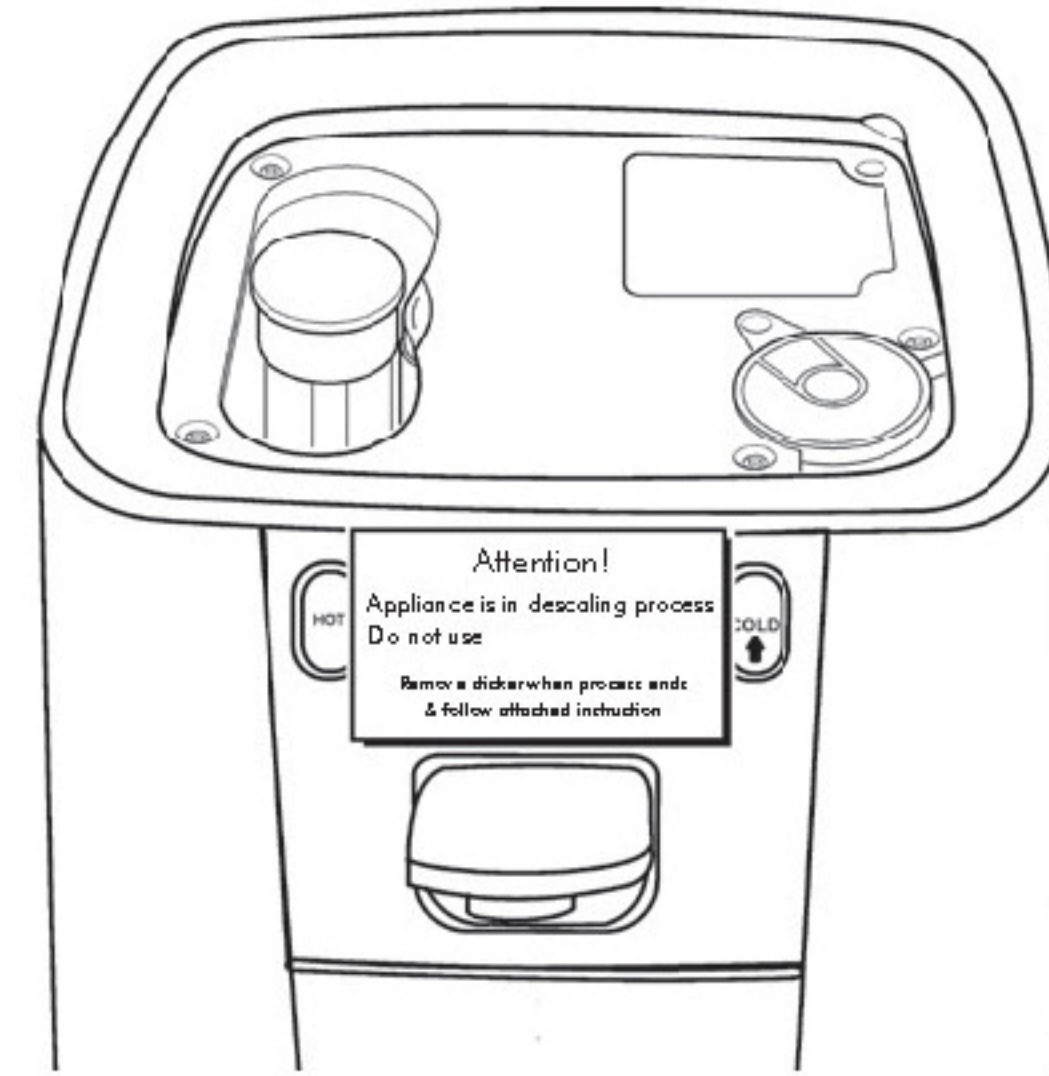

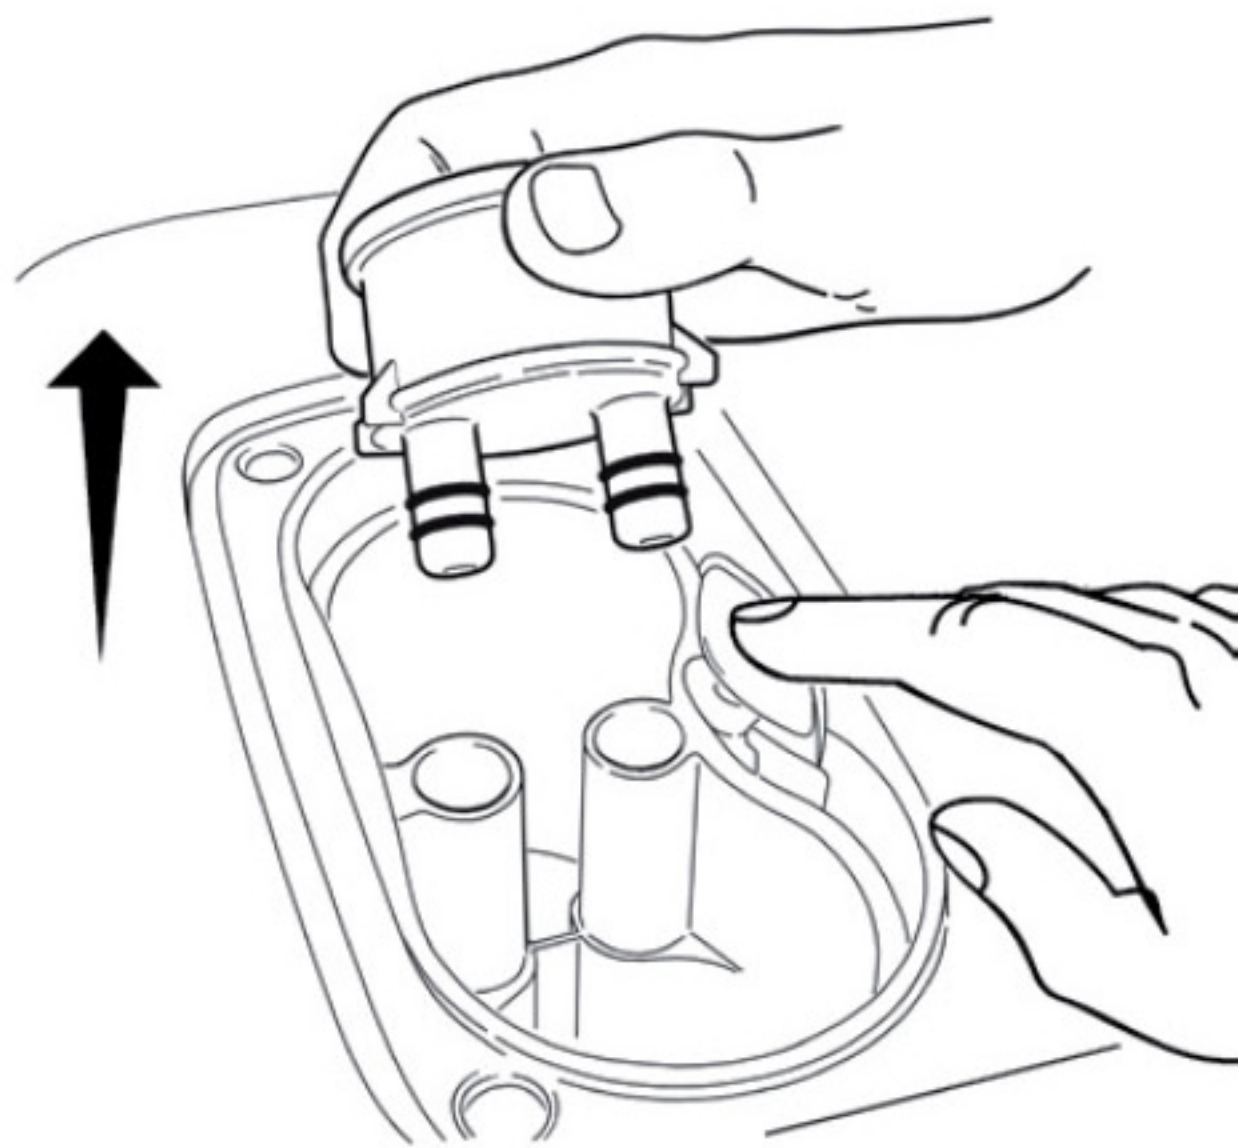

- 7** Press the HOT water button and let hot water run for 1 minute.

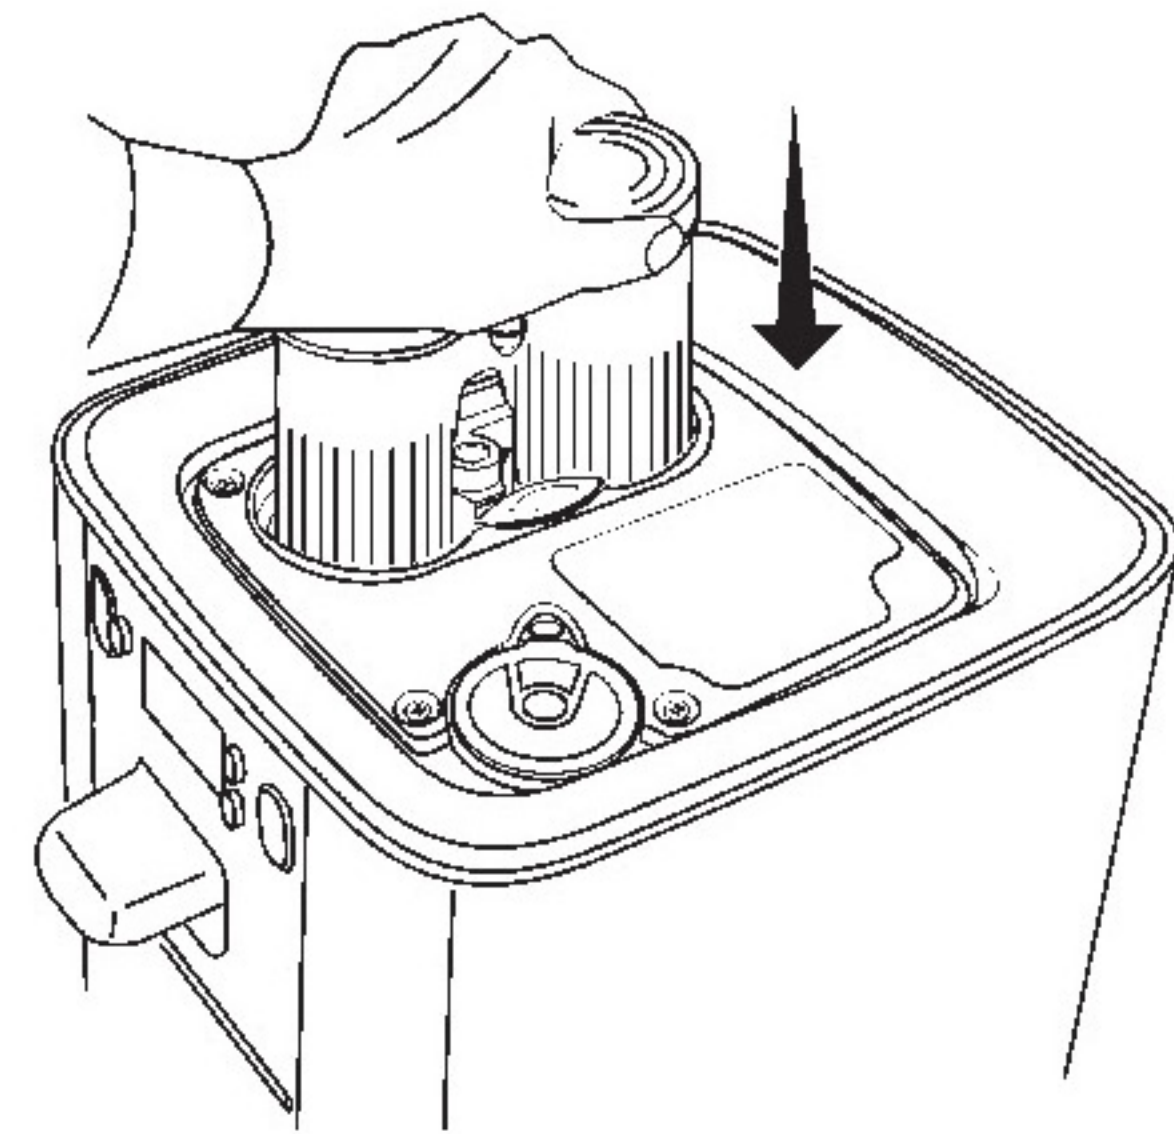

- 8** Attach the included warning label on the front of the water bar **and wait for at least 6 hours.**

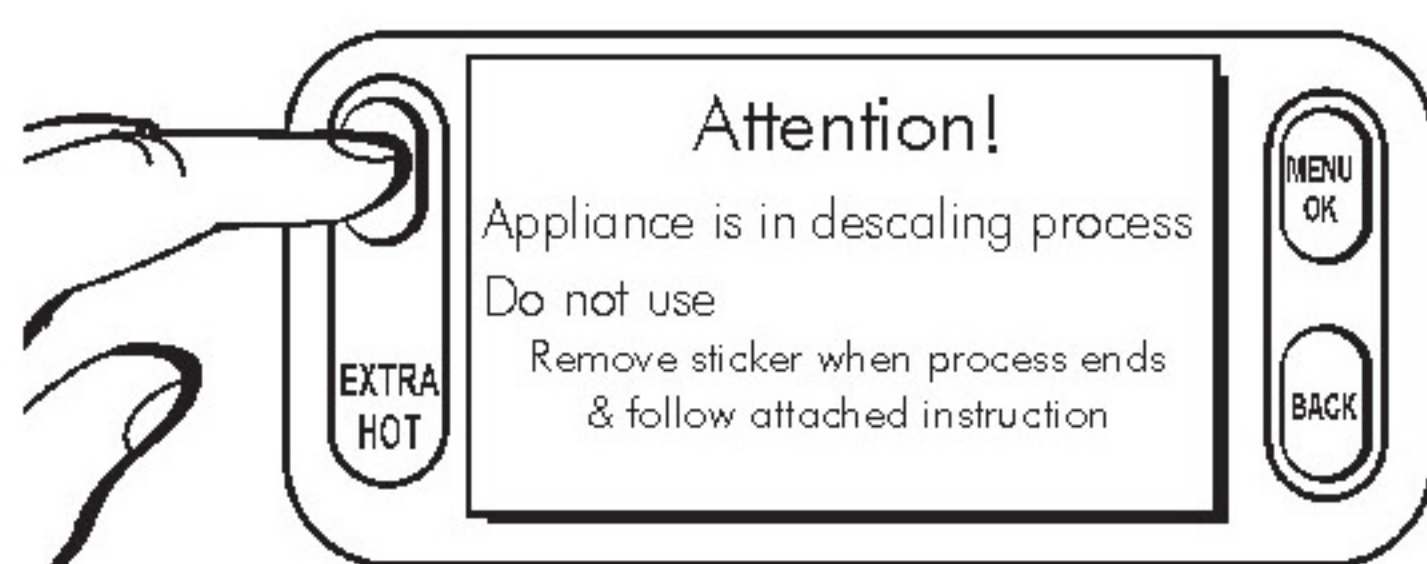

- 9** After waiting, press the PUSH button and remove the capsule.

- 10** Place a 5 liter container under the spout, replace the filter and push until you hear a click.

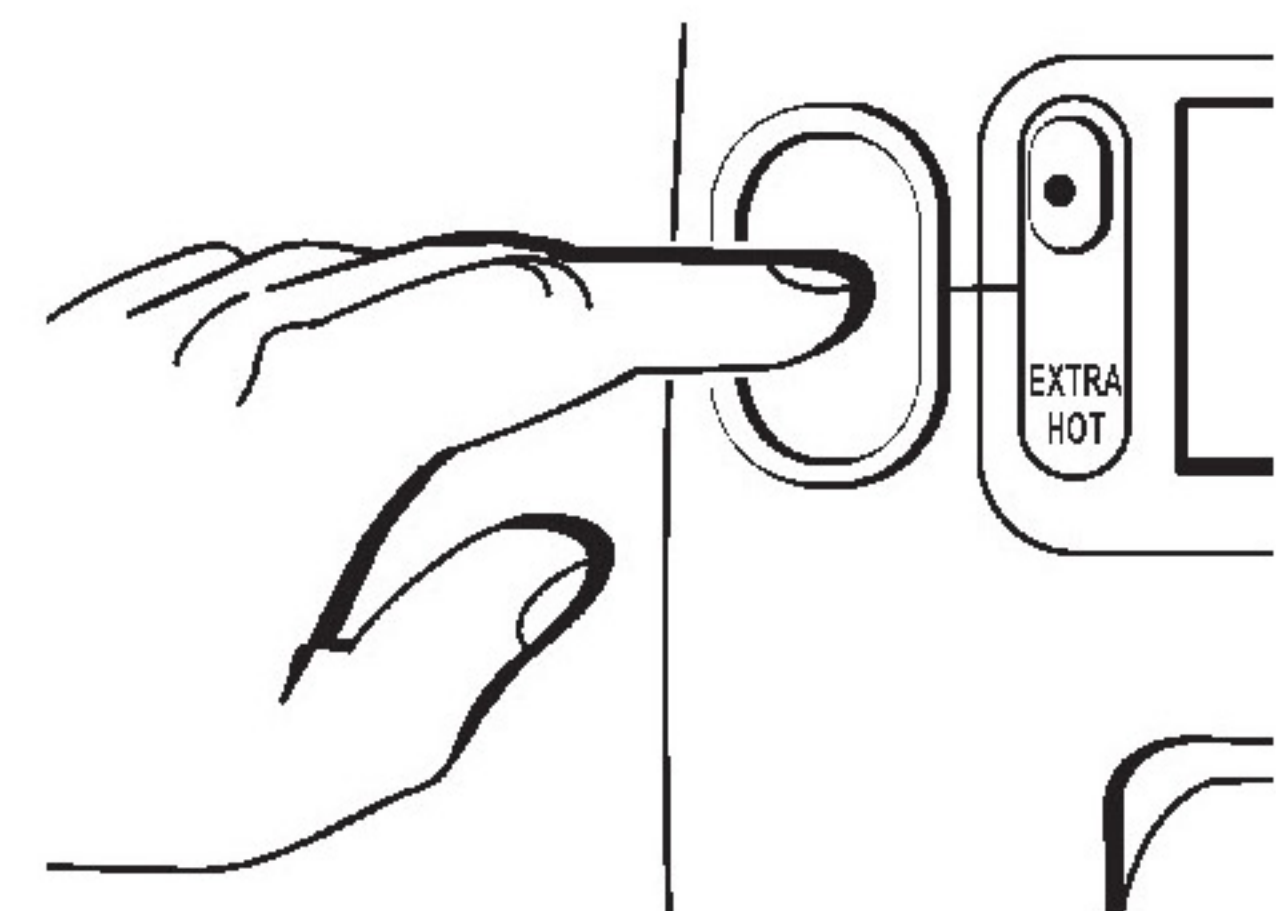

- 11** Press the EX (EXTRA HOT) button and wait until the water will boil.

- 12** Press the HOT water button and let hot water run for three minutes.

**Remark:** if there are still scale particles in the water perform this step again.

- 13** The descaling process is completed. Remove the warning label. The water bar is ready for use.

**Enjoy!**

# Troubleshooting

	Fault Description	Action to Take
<b>1</b>	No water flow	<ul style="list-style-type: none"><li>● Remove the capsule and replace it until it clicks into place.</li><li>● If the problem persists, press the capsule while dispensing water.</li><li>● If the problem still persists, contact our Service Department.</li></ul>
<b>2</b>	Particles in the water after cleaning	<ul style="list-style-type: none"><li>● Perform Automatic flushing (see p.18, paragraph5d).</li><li>● If the problem persists, contact our Service Department.</li></ul>
