

**Filter and UV-C
Lamp Kit
T6 Water Purifier**

This kit contains a filter and a UV-C lamp

How to replace the filter?

a. Removing the used filter and installing a new one

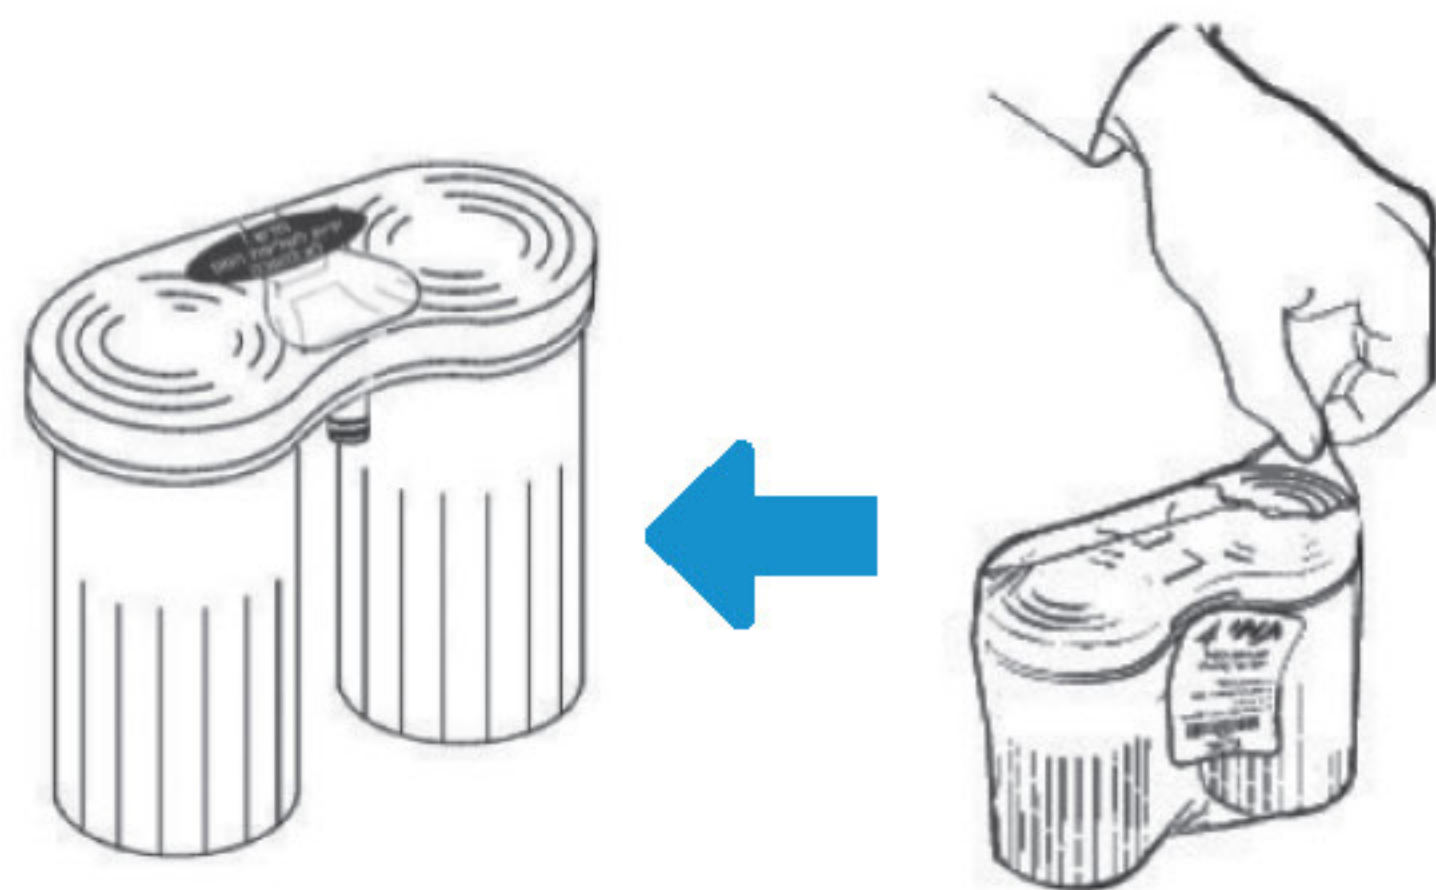

- 1** Remove the top cover.

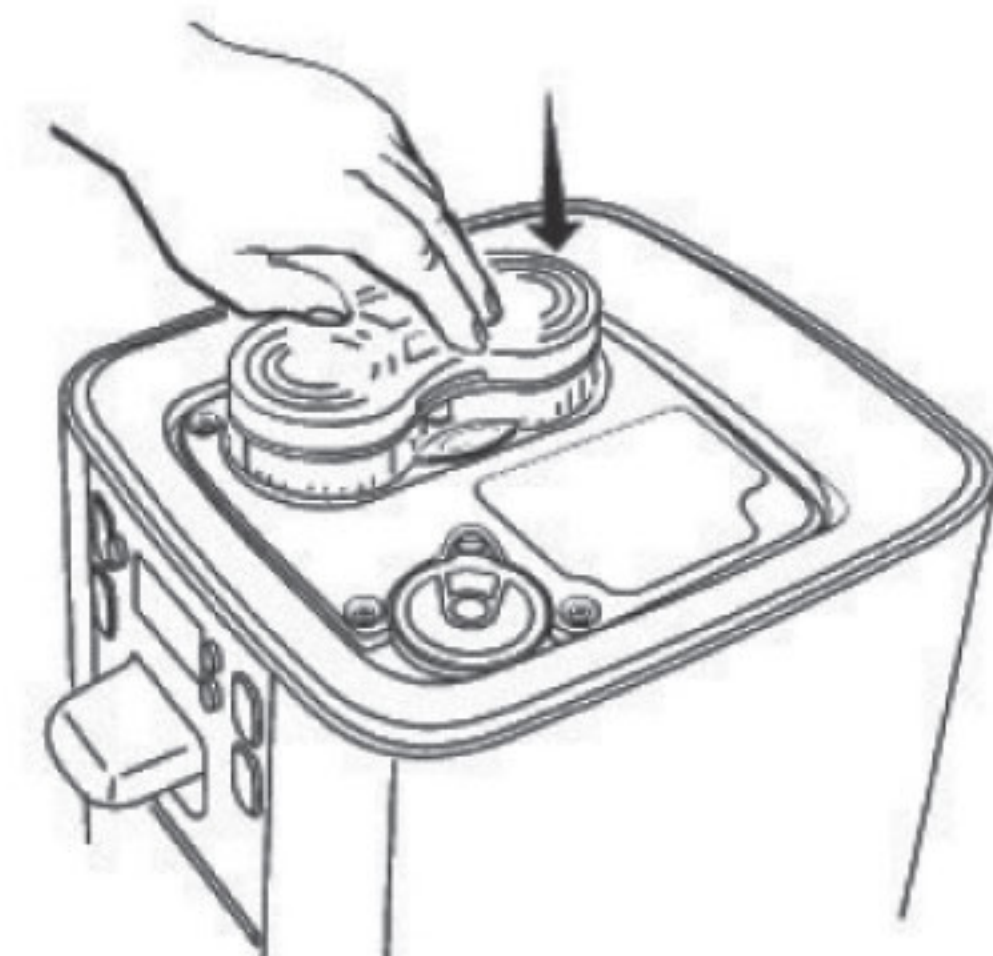

- 2** Press the PUSH button, pull the filter upwards using the extraction band.

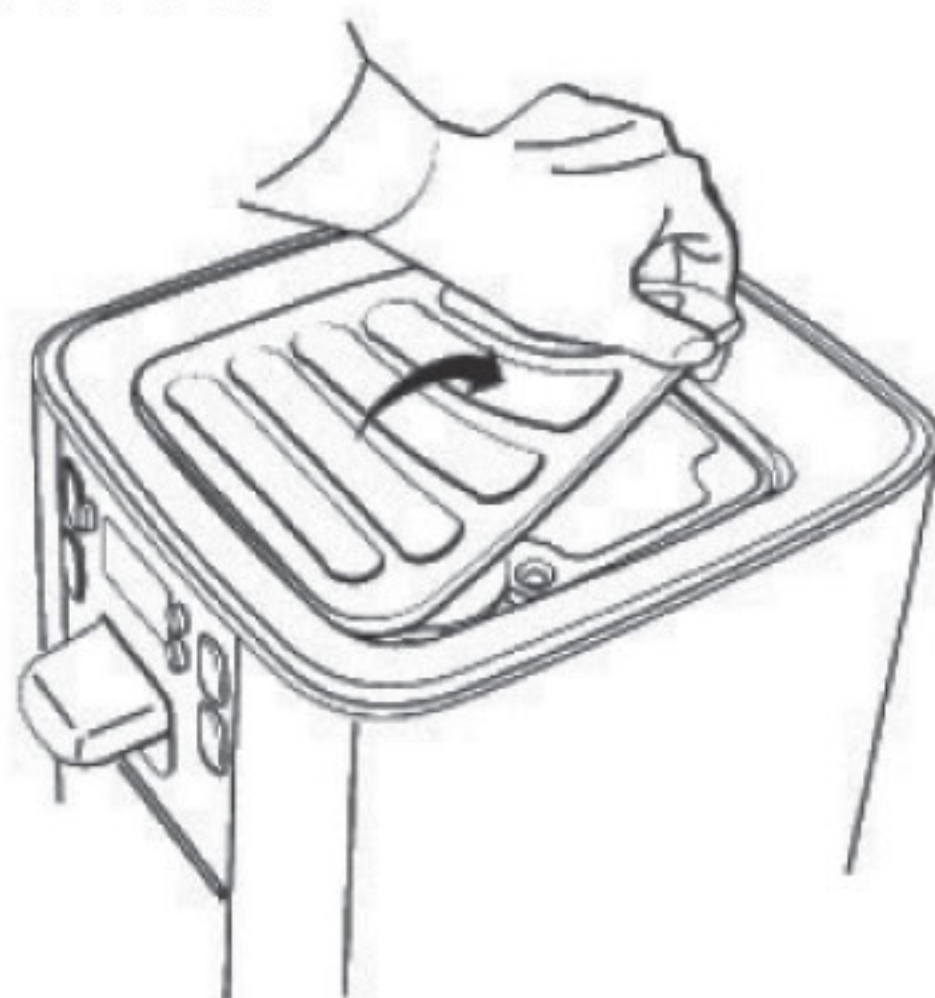

- 3** Remove the new filter from its wrapper.

- 4** Insert the filter until you hear a click.

- 5** Replace the top cover.

b. Draining air from the new filter

- 1 Press the COLD water button for 2 minutes.

- 2 Wait 10 minutes.

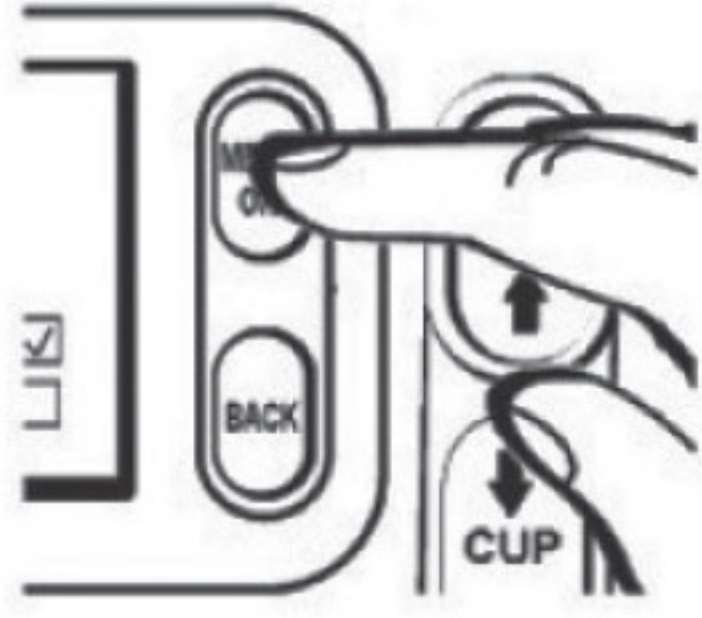

- 3 Press the COLD water button again until water starts running.

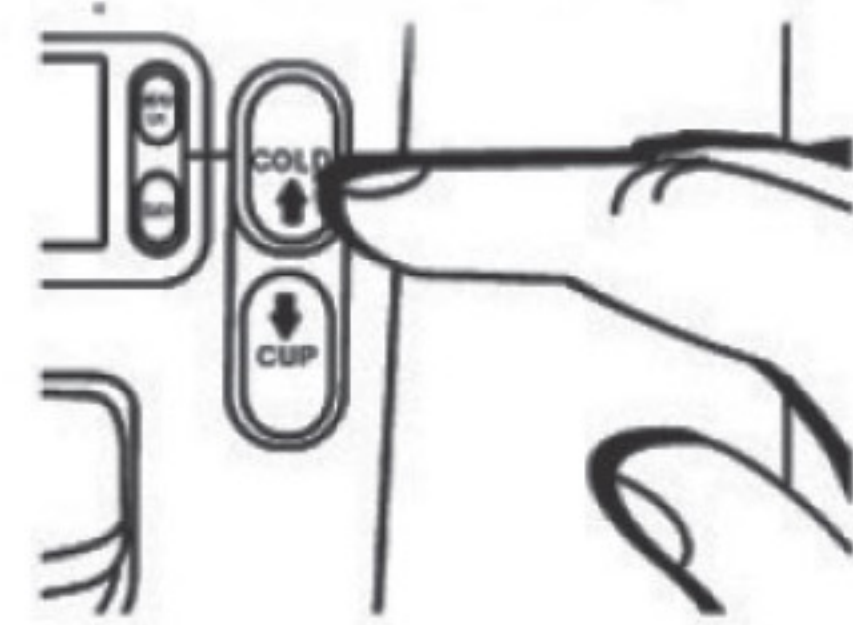

c. Resetting the filter's counter

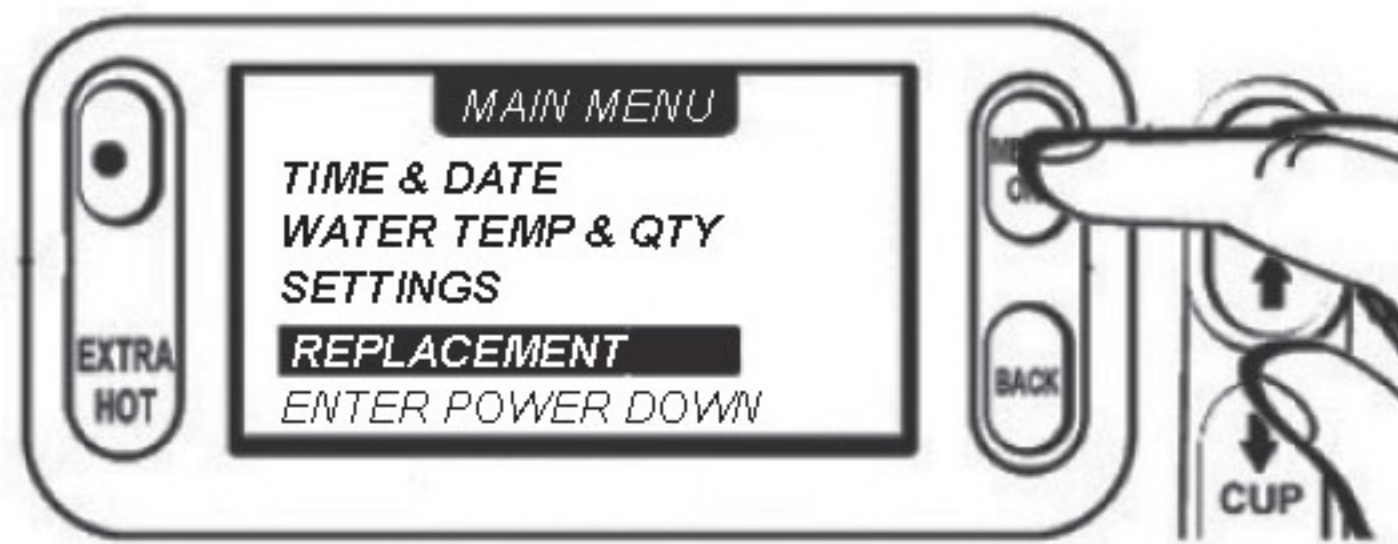

1 Press MENU.

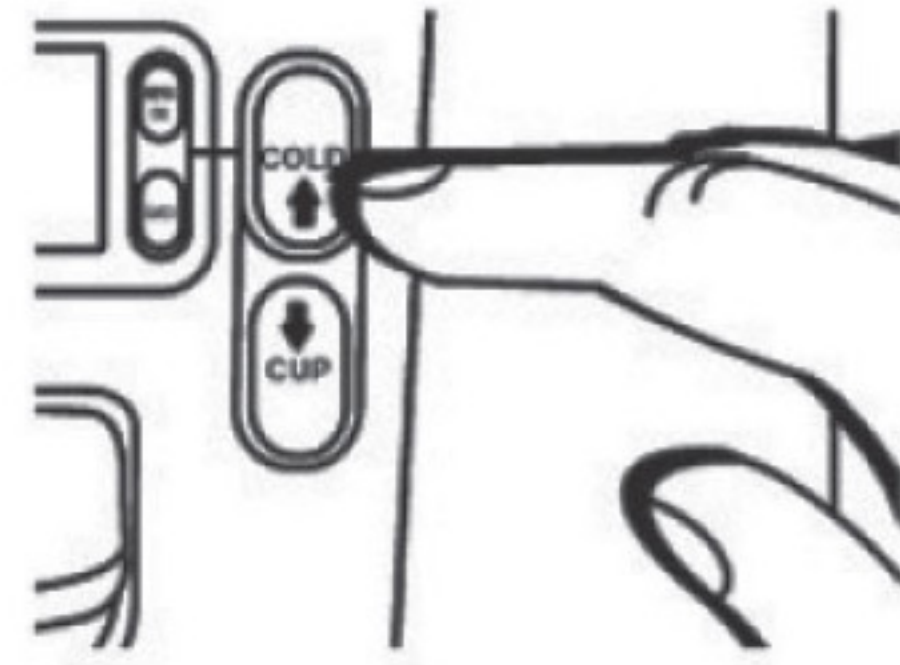

2 Scroll to "Replacing filter/lamp".

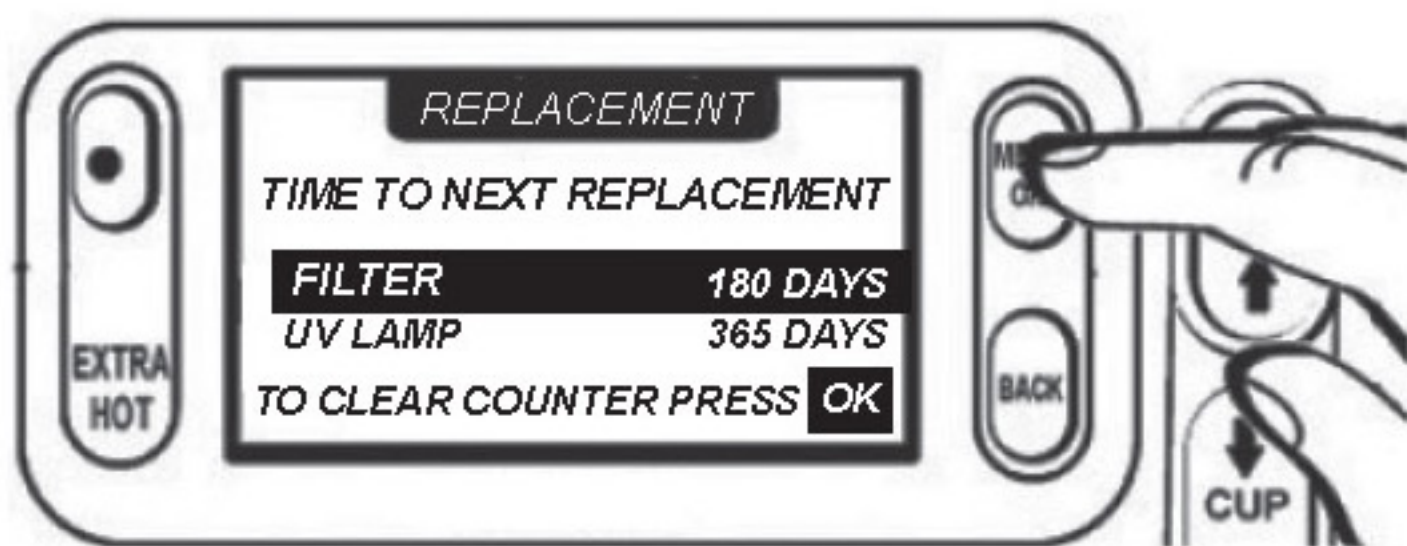

3 Press OK.

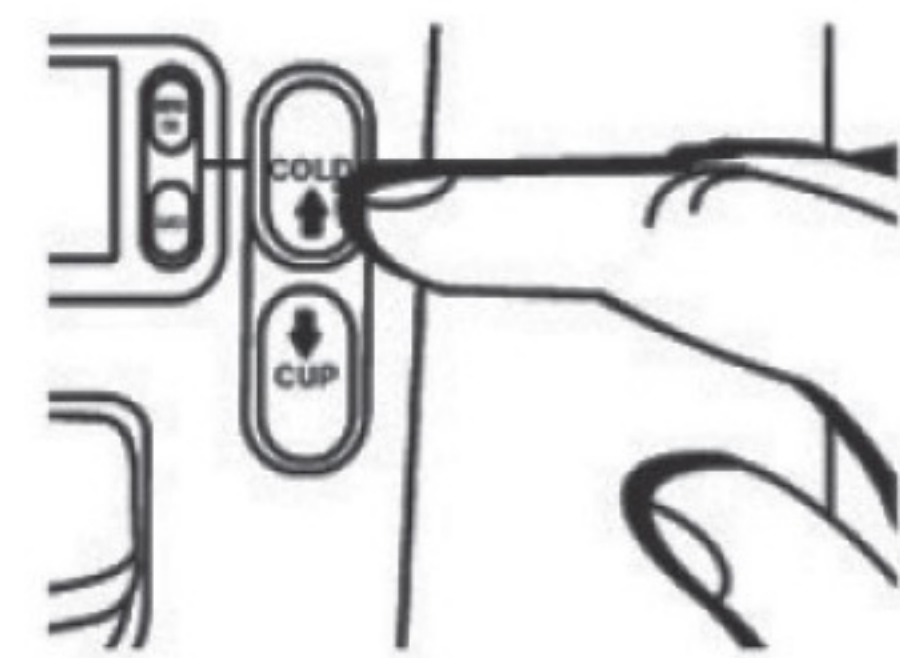

4 Scroll to "Filter".

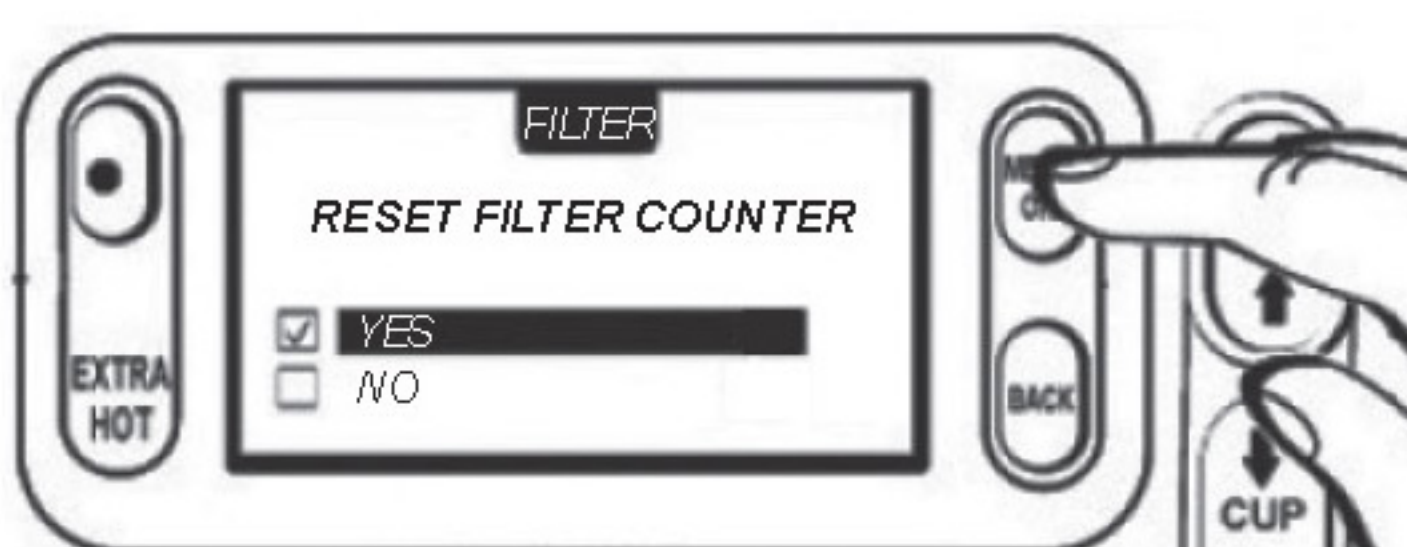

5 Press OK.

6 Scroll to "Yes".

7 Press OK.

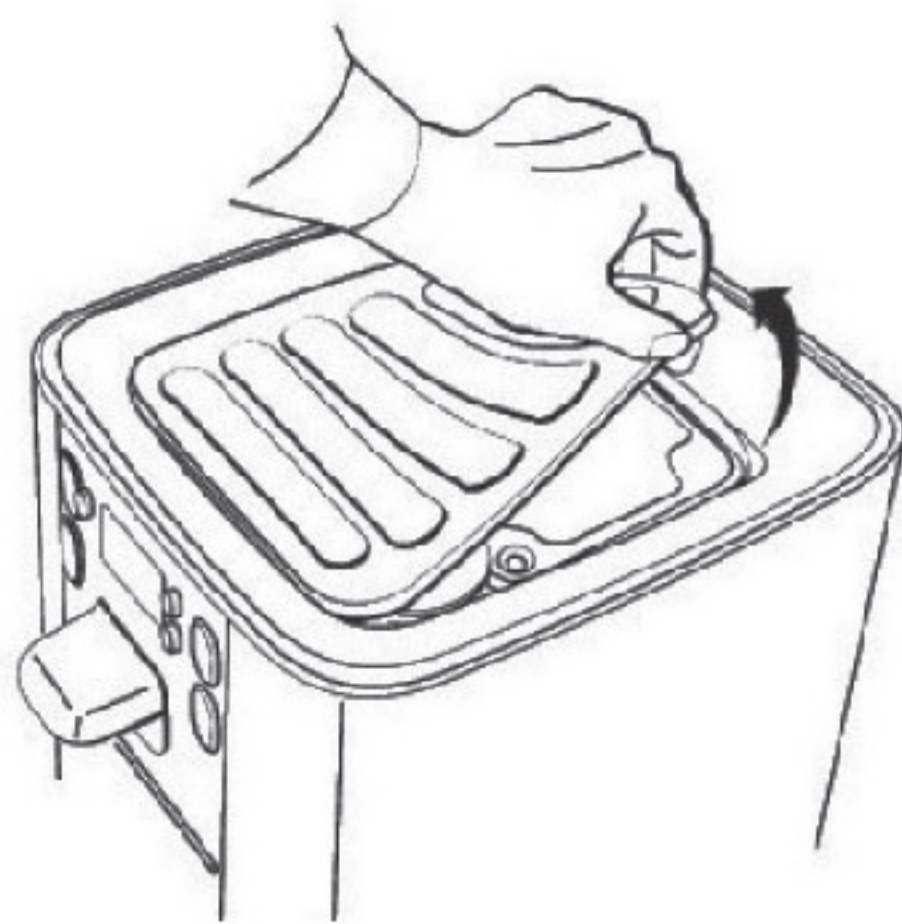

8 Press BACK until the main screen appears.

How to replace the UV-C lamp?

Warning: It is forbidden to turn on the UV-C lamp outside the device. Using it not according to the intended use or damage to the UV lamp socket may cause the escape of UV-C radiation which is harmful to the eyes and skin. The water purifier should not be operated in case of defect or damage to the lamp.

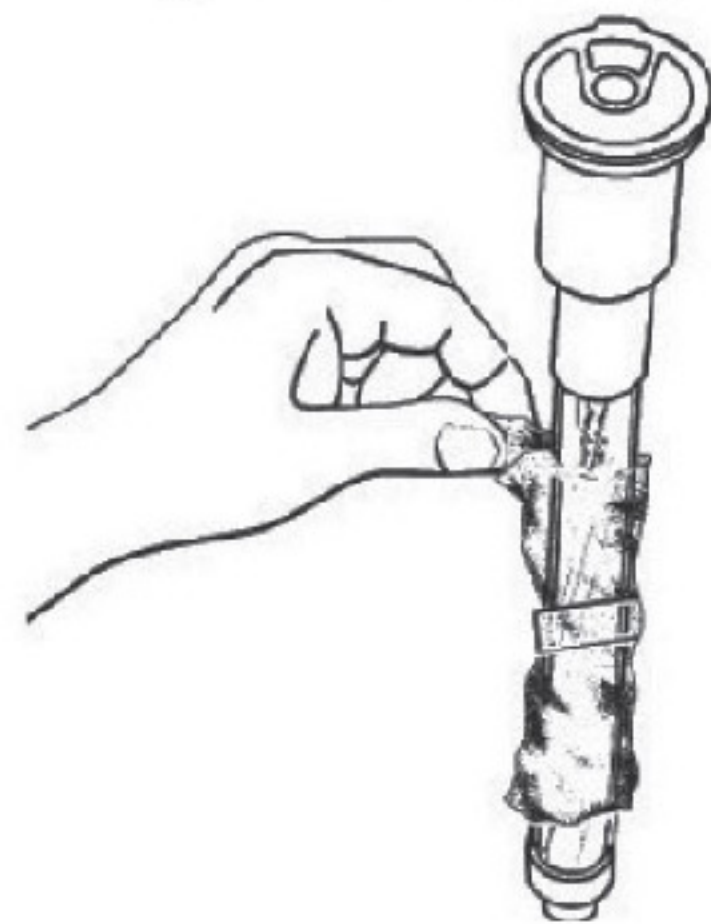

1 Remove the top cover.

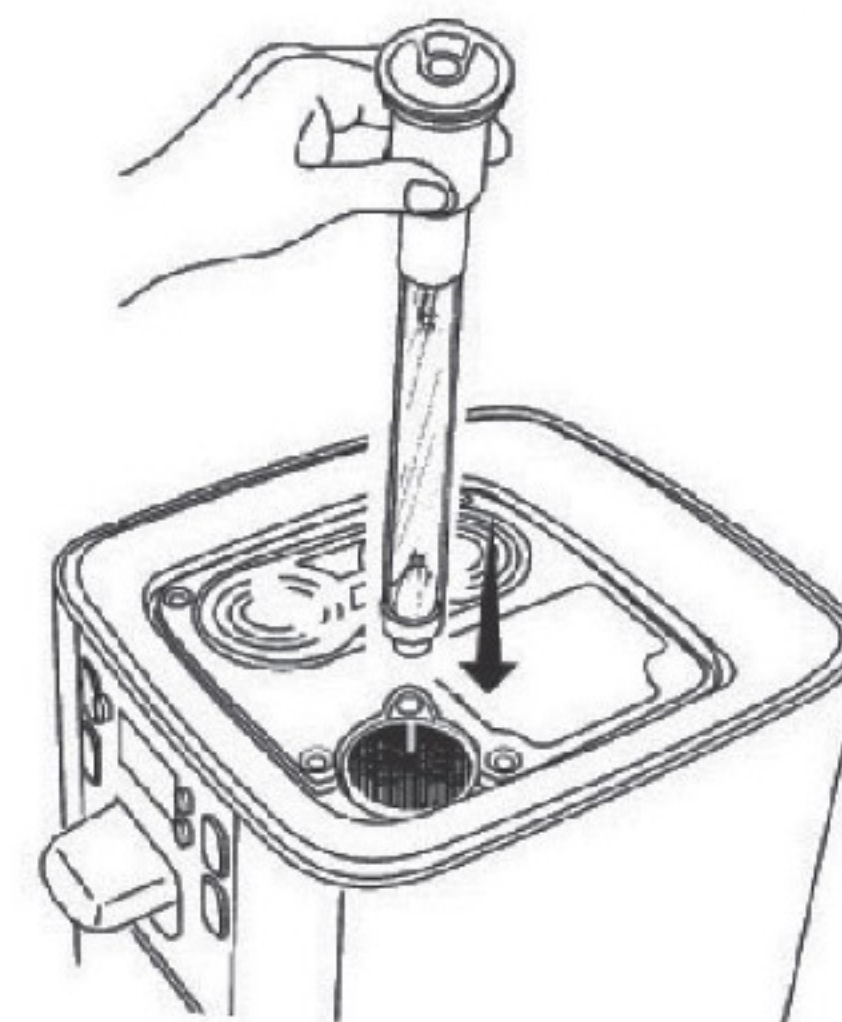

2 Pull the lamp upwards.

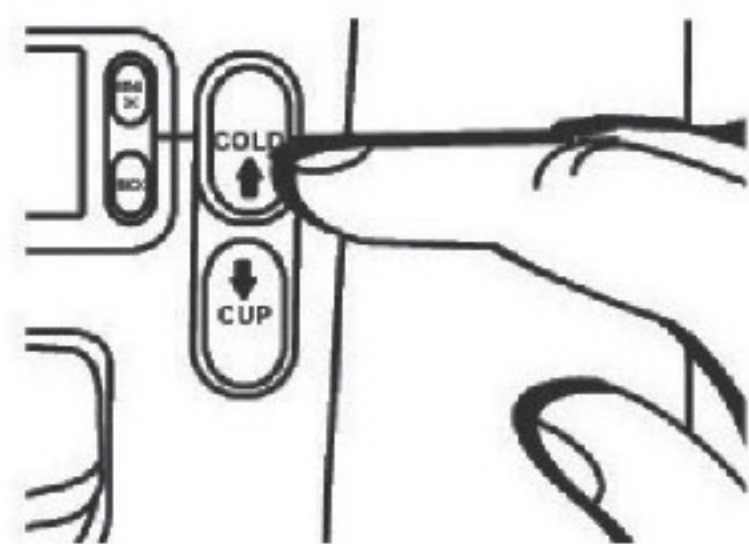

3 Remove the new lamp from its wrapper (avoid touching the lamp itself).

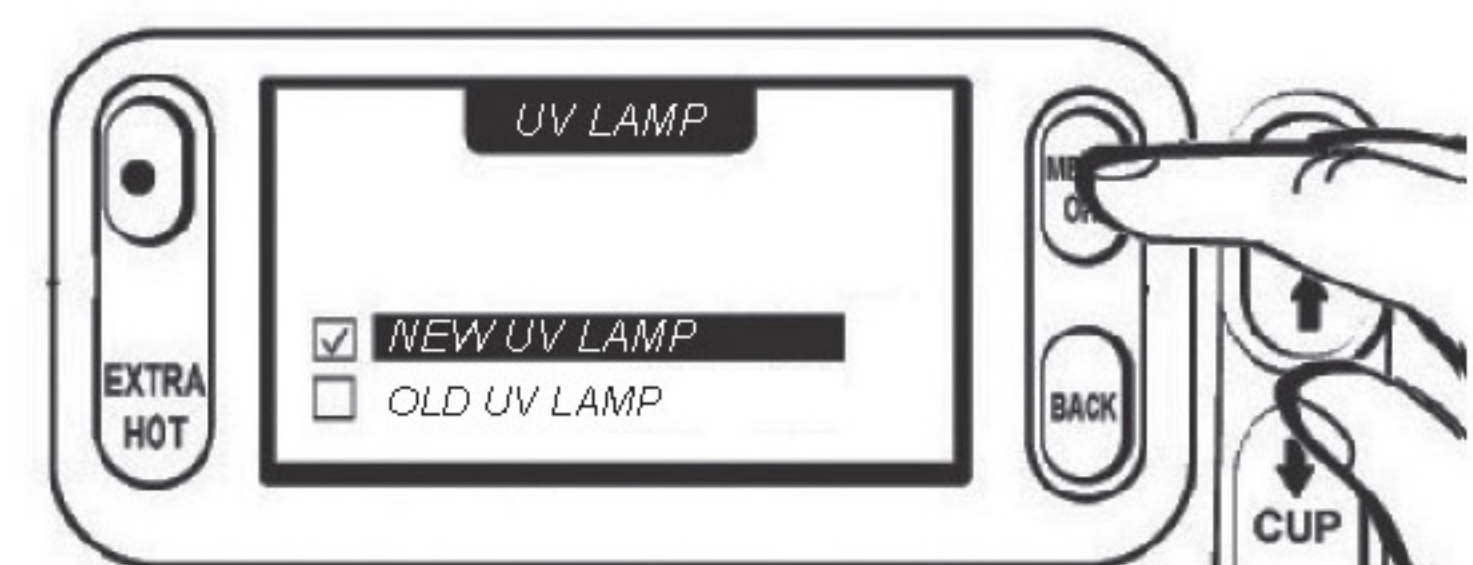

4 Insert the new lamp into the water purifier.

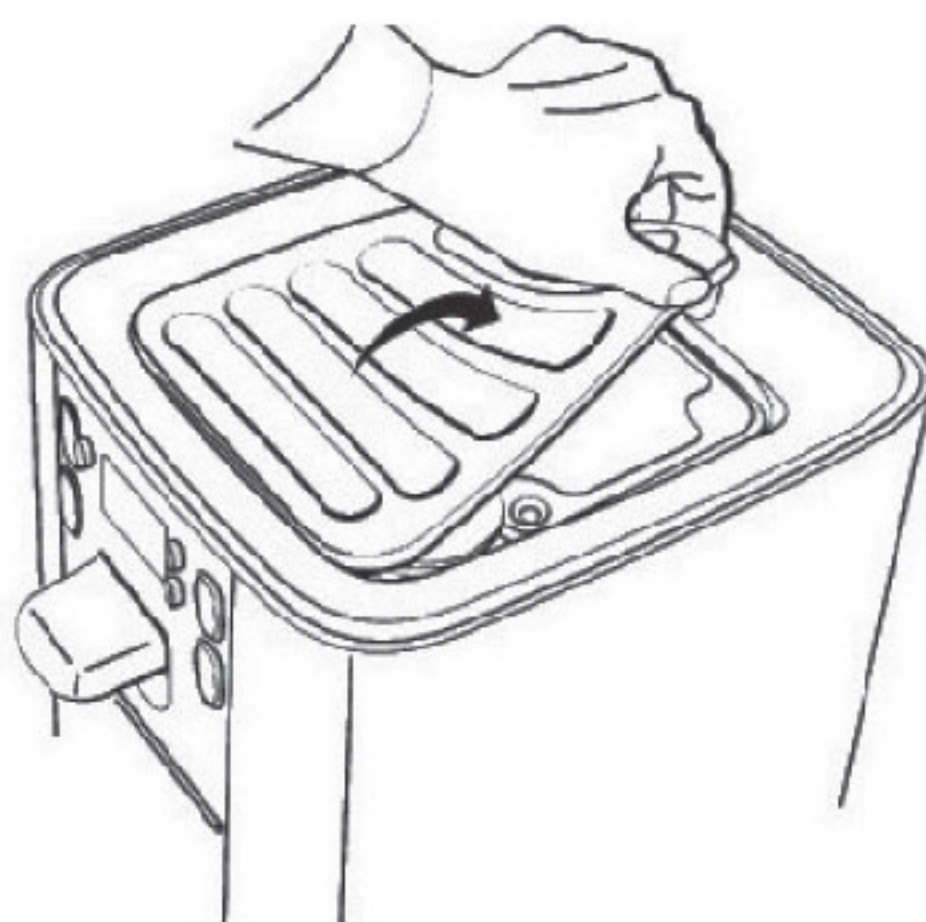

5 Scroll to "NEW UV LAMP".

6 Press OK.

7 Replace the top cover.

| | Symptom | Resolution |
|---|---|--|
| 1 | Slow water flow | <ul style="list-style-type: none"> ● Remove and re-insert the filter, making sure that it fits into the filter holder completely. ● If the problem persists, contact our Service Department. |
| 2 | Cold water keeps running for a while after releasing the button | <ul style="list-style-type: none"> ● Wait for about 10 minutes and try again. ● If the problem persists, contact our Service Department. |
| 3 | No water comes out (cold only) | <ul style="list-style-type: none"> ● Remove and re-insert the lamp. ● Unplug and re-plug the device to the power source. ● If the problem persists, contact our Service Department. |
| 4 | The lamp does not come out | <ul style="list-style-type: none"> ● Use a spoon to remove the lamp. |
| 5 | Hot and cold water come out simultaneously | <p>Possibility A If you have pressed the COLD button but hot water come out, dispense hot water for 2-3 minutes.</p> <p>Possibility B If you pressed the HOT button but cold water come out, dispense cold water for 2-3 minutes.</p> <ul style="list-style-type: none"> ● If the problem persists, contact our Service Department. |
